

CCSBT-CC/2410/04 (Rev.1)

COMPLIANCE WITH CCSBT MANAGEMENT MEASURES CCSBT 管理措置の遵守状況

EXECUTIVE SUMMARY

概要

This paper provides a summary of compliance with CCSBT conservation and management measures by Members and Cooperating Non-Members (CNMs). Reporting on implementation of Ecologically Related Species (ERS) measures is provided in paper [CCSBT-CC/2410/05](#).

本文書では、メンバー及び協力的非加盟メンバー（CNM）による CCSBT 保存管理措置の遵守状況の概要を提示する。生態学的関連種（ERS）関連措置の実施状況に関する報告は文書 CCSBT-CC/2410/05 のとおりである。

The main areas of identified compliance concern are:
遵守上の懸念が確認された主な分野は以下のとおりである。

Over-catches (Indonesia)

過剰漁獲（インドネシア）

Indonesia over-caught its Total Available Catch in both its 2019 and 2020 seasons, resulting in a combined 2019-2020 over-catch of 456.584t. Indonesia is in the process of paying back this over-catch between 2022 to 2026 inclusive.

インドネシアは、2019年及び2020年の両漁期において同メンバーの総漁獲利用可能量を超えて漁獲し、両漁期を合わせた総過剰漁獲量は456.584トンとなった。インドネシアは、この過剰漁獲分を2022年から2026年までの期間において返済するプロセスの途中にある。

Corrective Action Plan (South Africa)

是正行動計画（南アフリカ）

The Twenty-Ninth Meeting of the Extended Commission (EC 29) requested that South Africa provide a corrective Action Plan in advance of CCSBT 30, however this report was not submitted to CCSBT 30. In response to questions from Members and the Chair at CC18, South Africa advised that it planned to provide a Corrective Action Plan no later than 31 December 2023, and that this would then be followed by the submission of missing data and country reports.

第29回拡大委員会会合（EC 29）は、南アフリカに対して CCSBT 30 までに是正措置計画を提出するよう要請したが、当該報告は CCSBT 30 に対して提出されなかった。CC 18 におけるメンバー及び議長からの質問に対し、南アフリカは、是正行動計画を2023年12月31日までに提出する予定であること、またそれに続いて未提出となっているデータ及び国別報告書を提出することを述べた。

At the time of finalising this paper, the Secretariat has not yet received South Africa's corrective Action Plan together with a timeframe for addressing its non-compliance issues. However, South Africa has now provided outstanding data to the Ecologically Related Species (ERS) Data Exchange and the Scientific Data Exchange.

本文書を最終化した時点において、事務局は、南アフリカの是正行動計画（同メンバーの非遵守問題に対処するためのスケジュールを含む）を受領していない。しかしながら、南アフリカは生態学的関連種（ERS）データ交換及び科学データ交換において未提出だったデータを提供した。

Implementation of CCSBT's Transshipment Resolution Requirements (Indonesia) **CCSBT 転載決議の要件の実施（インドネシア）**

Indonesia did not submit any information or reports to meet the obligations of CCSBT's Transshipment Resolution for at-sea transshipments involving SBT conducted by Indonesian longliners with freezing capacity during 1 January and 31 October 2023. On 1 November 2023, a trial commenced that allows Indonesia to use their own national observers to monitor SBT transshipments at sea to specified wooden Indonesian-flagged Carrier Vessels. Indonesia has started reporting transshipment activity following the commencement of this trial. However, the information and reports provided have been incomplete and have most often been submitted late. Indonesia therefore did not fully meet the obligations of the Transshipment Resolution in 2023, including requirements relating to the two-year observer trial¹.

インドネシアは、2023年1月1日から10月31日までの期間において冷凍能力を有するインドネシアはえ縄漁船が実施した SBT を含む洋上転載について、CCSBT 転載決議に基づく義務を履行するための情報又は報告書を提出しなかった。インドネシアが指定されたインドネシア船籍木造運搬船への SBT 洋上転載を監視するために独自の国内オブザーバーを利用できるようにするためのトライアルは2023年11月1日に開始された。インドネシアは、同トライアルの開始以降、活発に転載報告を行うようになった。しかしながら、これまでに提出された情報及び報告書は不完全であり、その多くの提出は期限を超過した。したがって、インドネシアは、2023年において、転載決議に基づく義務（2年間の国内オブザーバートライアルに関する要件を含む）を完全には履行していない。

Other Matters

その他の事項

Other prevailing areas of compliance concern that CC may wish to further consider include: CC が検討した方が良くと考えられるその他の遵守上の懸念分野には以下が含まれる。

- **South Africa:**
南アフリカに関して、

¹ Refer to Section 3 of [CCSBT-CC/2410/06](#) and paper [CCSBT-CC/2410/13](#) for further details. 詳細は文書 [CCSBT-CC/2410/06](#) のセクション 3 及び文書 [CCSBT-CC/2410/13](#) を参照。

- Did not attend meetings of SFMWG 6² (2023), ERSWG 14³ (2022), ESC 26 (2021), ESC 27 (2022) and ESC 28 (2023);
SFMWG 6 会合 (2023 年)、ERSWG 14 会合 (2022 年)、ESC 26 会合 (2021 年)、ESC 27 会合 (2022 年) 及び ESC 28 会合 (2023 年) に出席しなかった。
- Did not submit its National Report to CC18⁴/ EC30 in 2023;
2023 年の CC 18/EC 30 に対する国別報告書を提出しなかった。
- Did not submit a National Report to ERSWG 14 (2022) nor to the ESC26, ESC 27 or ESC 28 in 2021, 2022 and 2023 respectively, however did submit reports to ERSWG 15 and ESC 29 (both 2024);
ERSWG 14 (2022 年)、又は 2021 年の ESC 26、2022 年の ESC 27、2023 年の ESC 28 のいずれにも国別報告書を提出しなかったが、ERSWG 15 及び ESC 29 (いずれも 2024 年) に対する国別報告書は提出した。
- Has submitted CMFs for 2023 late or that are incomplete and have also submitted 15 Catch Monitoring Forms (CMFs) with duplicate numbers. However, all 2023 CMFs forms have been received on compliant forms.; and 2023 年の漁獲モニタリング様式 (CMF) について、遅延して提出したか又は不完全な CMF を提出し、また 15 件の番号が重複した CMF を提出した。しかしながら、2023 年の CMF 様式は全て正しい様式を用いて提出された。
- Has not submitted its 2023 port inspection reports to the Secretariat within the required 14-day timeframe specified in the ‘Resolution for a CCSBT Scheme for Minimum Standards for Inspection in Port’, nor notified the reason for the delay within the 14-day timeframe.
事務局に対して同メンバーによる 2023 年の港内検査報告書を「港内検査の最低基準を定めた CCSBT 制度に関する決議」が規定する 14 日間の提出期限内に提出しておらず、又は 14 日の提出期限よりも提出が遅れる理由に関する通知も行っていない。
- The EU did not attend meetings of SFMWG 6 (2023), ERSWG 14 (2022), ESC 26 (2021), ESC 27 (2022), ESC 28 (2023), CC18, CCSBT 30 and will not be attending CCSBT 31.
EU は、SFMWG 6 (2023 年)、ERSWG 14 (2022 年)、ESC 26 (2021 年)、ESC 27 (2022 年) 及び ESC 28 (2023 年)、CC 18 及び CCSBT 30 に出席せず、また CCSBT 31 にも出席しない見込みである。
- The EU has not submitted National Reports to ERSWG 14, ERSWG 15, ESC 27, ESC 28 and ESC 29.⁵

² The Sixth Strategy and Fisheries Management Working Group Meeting 第 6 回戦略・漁業管理作業部会

³ The Fourteenth Meeting of the Ecologically Related Species Working Group 第 15 回生態学的関連種作業部会

⁴ The Eighteenth Meeting of the Compliance Committee 第 18 回遵守委員会会合

⁵ The EU responded to the draft Compliance with Measures tables and reiterated their belief that this requirement should be assessed as not applicable because “the EU does not have a SBT fishery, does not target SBT and have not reported any by-catches of SBT in the relevant reporting period”. EU は、措置の遵守状況に関する一覧表案に関して返答し、「EU には SBT 漁業がなく、SBT を漁獲対象としておらず、また関連する報告期間において SBT の混獲は何ら報告されていない」ので本報告要件の適用対象外であり評価自体されるべきではないとする考えを繰り返し述べた。

EUは、ERSWG 14、ERSWG 15、ESC 27、ESC 28 及び ESC 29 に対して国別報告書を提出しなかった。

- Korea has persistently not submitted copies of all expected import copies of CDS documents to the Secretariat (refer to section 8.2).

韓国は、依然として、事務局に対して想定される輸入 CDS の写しを全く提出していない（セクション 8.2 を参照）。

1. Introduction

序論

To assist with a review of compliance, the Secretariat has compiled a concise table (**Attachment A**) summarising compliance with CCSBT measures (especially for the CDS) for submissions received by 05/09/2024 with respect to data submission and reporting requirements for the most recent calendar year or similar period.

遵守状況のレビューに資するため、事務局は、直近の暦年又はそれに準ずる期間におけるデータ提出及び報告要件に関わる CCSBT 措置（特に CDS）の遵守状況（2024 年 9 月 5 日までに受領したデータに基づくもの）を総括表（別紙 A）として取りまとめた。

The Fifth Meeting of the Compliance Committee (CC5) agreed that the Secretariat should annually update the information contained within the "Characterisation of global fisheries for southern bluefin tuna", with the most recent year's data. The updated information is provided at **Attachment C**.

第 5 回遵守委員会（CC 5）会合は、事務局が、直近のデータを用いて「全世界のみなみまぐろ漁業の特徴」の情報を毎年アップデートすべきことに合意した。更新された情報は別紙 C のとおりである。

2. Catch and Allocation

漁獲量及び国別配分量

The Total Allowable Catch is CCSBT's primary conservation measure. A comparison of total SBT mortalities against total available catch (which takes into account allocations, transfers and carry-forward of unfished allocations) by Member/Cooperating Non-Member (CNM) since the 2010 season is provided at **Attachment B**. Monthly catch reports are usually the most up to date source of information for this comparison and have been totalled up to and including July 2024. Information from other reports to CCSBT have also been included where possible.

総漁獲可能量は、CCSBT における第一義的な保存措置である。2010 年漁期以降におけるメンバー／協力的非加盟メンバー（CNM）別の総漁獲利用可能量（国別配分量と自主的移譲分及び未漁獲の配分量の繰越しを考慮したもの）に対する総 SBT 死亡量の比較は別紙 B のとおりである。通常、本比較においては月別漁獲報告が最も直近の情報源となっており、2024 年 7 月までの分が総計されている。CCSBT に対する他の報告から得られた漁獲量についても、可能な限りこれに含めている。

3. Corrective Actions

是正措置

Indonesia

インドネシア

Indonesia over-caught its Total Available Catch in both its 2019 and 2020 fishing seasons, resulting in a total over-catch for the two seasons combined of 456.584t. Indonesia is paying back this over-catch between 2022 to 2026 inclusive according to its Payback Plan (refer to paper [CCSBT-CC/2410/06](#)).

インドネシアは、2019年及び2020年の両漁期において同メンバーの総漁獲利用可能量を超過して漁獲し、両漁期を合わせた総過剰漁獲量は456.584トンであった。インドネシアは、同メンバーの返済計画（文書 [CCSBT-CC/2410/06](#) を参照）に基づき、2022年から2026年までの間にこの過剰漁獲分を返済するプロセスの途中にある。

South Africa

南アフリカ

At the time of finalising this paper, the Secretariat had not yet received South Africa's corrective action plan together with a timeframe for addressing its non-compliance issues. 本文書を最終化する時点において、事務局は南アフリカの是正措置計画（非遵守問題に対処するためのスケジュールを含む）をまだ受領していない。

4. Transshipment Issues

転載に関する問題

Indonesia

インドネシア

At the time of finalising this paper, Indonesia has not provided any observer deployment requests, transshipment declarations, or observer reports to CCSBT for transshipments that occurred during the period 1 January 2023 to 31 October 2023.

本文書を最終化した時点において、インドネシアは、CCSBTに対し、2023年1月1日から2023年10月31日までに実施された転載に関するオブザーバー配乗要請、転載申告書又はオブザーバー報告書を全く提出していない。

CCSBT began its two-year trial at-sea transshipment programme using Indonesia national observers on 1 November 2023. Between 1 November 2023 and 31 December 2023 18 deployment requests were received that recorded a total of 304 planned SBT transshipments. Transshipment declarations were received for only 63 of these planned transshipments, despite other records confirming that additional transshipments had taken place. There are significant gaps in the required transshipment records and information that has been provided by Indonesia. Where records and information have been submitted by Indonesia, these are most often received outside of the timeframes required in the Transshipment Resolution⁶.

CCSBTは、2023年11月1日より、インドネシアの国内オブザーバーを利用する2年間の試行的洋上転載計画を開始した。2023年11月1日から2023年12月31日ま

⁶ See [CCSBT-CC/2410/06](#) for a detailed outline of the required transshipment records that were received from Indonesia in 2023 and [CCSBT-CC/2410/13](#) for further analysis that extends into the first quarter of 2024. 2023年にインドネシアから受領した義務的転載記録の詳細な総括は文書 [CCSBT-CC/2410/06](#) を、2024年第1四半期を含むさらなる解析結果については [CCSBT-CC/2410/13](#) を参照。

での期間について、合計 304 件の SBT 転載予定を記載した 18 件の配乗要請を受領した。これらの転載予定のうち、転載申告書を受領したのは 63 件のみであるにもかかわらず、他の記録から追加的な洋上転載が実施されたことが確認されている。義務付けられた転載記録と実際にインドネシアから提出された情報との間には大きなギャップがある。インドネシアから記録及び情報が提出されている場合、その多くは、転載決議が定める提出期限を超過して受領された。

5. Retrospective Vessel Authorisations

遡及的船舶許可

Indonesia

インドネシア

Indonesia has regularly been providing the Secretariat with retrospective CCSBT vessel authorisation information, where some vessel authorisations received commence months before the date they are submitted to the Secretariat.

インドネシアについては、事務局に対して遡及的に CCSBT 船舶許可情報を提出することが常態化しており、一部船舶については事務局に情報が提出された日付より数カ月前に許可期間が開始されている場合がある。

Paragraph 5 of the Authorised Vessel Resolution requires that each Member and Co-operating Non-member shall “promptly notify” the Executive Secretary of any addition to, any deletion from and/or any modification of the CCSBT Record at any time such changes occur. For vessel authorisations notified to the Secretariat by Indonesia between 1 June 2023 and 31 May 2024, 42% involved retrospective authorisations of a period greater than two weeks. For these retrospective authorisations the authorization commenced, on average, more than 64 days prior to the notification being received.

許可船舶決議のパラグラフ 5 では、各メンバー及び協力的非加盟メンバーは、CCSBT の記録への追加、削除、修正が生じた際に「速やかに事務局長に通知しなければならない」ことを義務付けている。2023 年 6 月 1 日から 2024 年 5 月 31 日までの間にインドネシアから事務局に対して通知された許可船舶情報のうち 42% に 2 週間以上の期間の遡及許可が含まれていた。こうした遡及的許可を平均すると通知の受領日より 64 日前から許可期間が開始されていた。

The Secretariat wrote to Indonesia in January 2024 to raise this issue and Indonesia responded stating:

事務局は、インドネシアに対して 2024 年 1 月にこの問題を提起し、インドネシアは以下のとおり回答した。

“We recognize importance of adhering to the prompt notification requirements and understand the need for timely and accurate vessel authorizations. Rest assured, we take this matter seriously and are committed to finding a suitable solution to prevent retrospective authorizations of Indonesian vessels in the future. Currently, we are developing a new system integrated with the fishing license application to prevent this issue happen in the near future.”

「我々は速やかな通知要件を遵守することの重要性を認識しており、また適時的かつ正確な船舶許可の必要性を理解している。我々はこの問題を真剣に受け止めており、将来においてインドネシア漁船の遡及的許可を防止するための適切な措置を講

ずることを約束する。我々は現在、近い将来にこの問題が再発することを防止するべく、漁業許可申請と統合された新システムを開発しているところである。」

6. CDS Issues

CDSに関する問題

Australia

オーストラリア

One Australian company made exports of SBT on four separate non-compliant forms, totalling 753.1kg. The forms used were Trade Information Scheme (TIS) forms which have not been in use since 2009. The Secretariat advised Australia of this issue in May 2024. あるオーストラリアの企業は、合計 753.1 kg の SBT について、4 件の正しくない様式により輸出した。使用された様式は、2009 年以降は使用されていない貿易情報スキーム (TIS) 様式であった。事務局は、オーストラリアに対し、この問題について 2024 年 5 月に通知した。

Australia investigated and advised the Secretariat that the re-exporter thought it had completed the correct documentation. This issue has now been rectified by the re-exporter submitting appropriate replacement REEFs.

オーストラリアは本件について調査し、事務局に対し、再輸出した業者は正しい文書を作成したものと考えていたことを述べた。本件については、再輸出業者が適切な REEF を再提出したことにより解決されている。

Australia has also not submitted sixteen (16) copies of import CMFs for imports into Australia during 2023. Of the remaining import CMFs provided by Australia, more than 40% of these were submitted after the submission deadline following notification from the Secretariat. Australia have confirmed to the Secretariat that they are in the process of exploring updates to their domestic regulation to improve the submission of forms relating to the import of SBT. Australia have discussed this further in their national report to CC19:

またオーストラリアは、2023 年にオーストラリアに輸入された 16 件の輸入 CMF の写しを提出していない。オーストラリアから提出された他の輸入 CMF のうち、40 % 以上は事務局からの通知を受けて期限後に提出されたものである。オーストラリアは、事務局に対し、SBT の輸入に関連する様式の提出状況を改善するべく、国内法の改正を検討するプロセスに入ったことを確認した。オーストラリアは本年についてさらに検討を進め、CC 19 に対する国別報告書において以下を述べている。

“We have previously advised the CCSBT that we are taking steps to improve the timely return of import Catch Documentation Scheme (CDS) forms. After an intensive trial working with importers to improve the voluntary return of CDS documents, Australia is now considering regulation that would require the return of these forms. The regulatory change process in Australia can take a long period of time, with the likely need for consultation periods with affected importers, and a parliamentary regulatory process. We will report on progress with this in next year’s National Report.”

「我々は以前、CCSBT に対し、輸入 CDS 様式のタイムリーな提出を改善するための措置をとっていることを述べた。CDS 文書の自主的提出を改善するための輸入業者との活発なトライアル作業を踏まえ、オーストラリアは現在、これらの様式の提出を義務付けるための法律を検討しているところである。オーストラリアの法改正プ

ロセスでは、影響を受ける輸入業者との協議期間及び国会による審議期間を要する可能性が高いため、長時間を要する可能性がある。我々は、来年の国別報告書の中で本件の進捗状況を報告する予定である。」

Indonesia

インドネシア

Indonesia has, to date, not provided High Seas statistical area information on 39% of their CMFs submitted to the Secretariat that included at-sea transshipments. The Secretariat has advised Indonesia of this issue. Indonesia has also not submitted nine (9) CMFs for small scale/artisanal SBT catch harvested between January and November 2023 that were reported in updated tagging data provided to the Secretariat in March 2024.

インドネシアは、これまでのところ、事務局に提出した洋上転載を含む CMF のうち 39 % において統計海区情報を提示していない。事務局はインドネシアに対してこの問題を通知した。またインドネシアは、2024 年 3 月に提出した更新漁獲標識データの中で報告された、2023 年 1 月から 11 月までの期間に小規模／沿岸零細漁業により漁獲された SBT に関する 9 件の CMF を提出していない。

New Zealand

ニュージーランド

In late 2023, the Secretariat became aware of SBT products being sold in New Zealand that were described as “*produced in Vietnam using NZ Line Caught Southern Bluefin Tuna.*”. This description indicated that the SBT had been re-exported from Viet Nam and imported back into New Zealand.

2023 年後期において、事務局は、ニュージーランド国内において「NZ はえ縄により漁獲されたみなみまぐろを使ってベトナムで生産された」として記載されている SBT 製品が販売されていることを確認した。この記載は、SBT がベトナムに再輸出され、その後さらにニュージーランドに再輸入されたことを示唆している。

Paragraph 1.2 of the CDS Resolution requires that imports under the jurisdiction of a Member shall be accompanied by a document described in Section 3 of the Resolution.⁷ Viet Nam is neither a CCSBT Member, Cooperating Non-Member nor OSEC⁸ so it cannot issue, certify nor validate CDS re-export documents to accompany any re-exported SBT. This therefore means that Paragraph 1.2 of the Resolution currently prohibits New Zealand from accepting SBT imported from Viet Nam.

CDS 決議パラグラフ 1.2 は、メンバーの管轄権の下での輸入 SBT には決議第 3 部に記載された文書が添付されなければならないことを義務付けている。ベトナムは CCSBT メンバー、協力的非加盟国又は OSEC ではないので、再輸出される SBT に添付される CDS 再輸出文書を発行、証明又は確認することができない。すなわち、現行決議パラグラフ 1.2 は、ニュージーランドがベトナムからの輸入 SBT を受け入れることを禁じている。

⁷ Section 3 specifies the documents as Farm Stocking Form, Farm Transfer Form, Catch Monitoring Form, Catch Tagging Form and/or Re-export or Export after Landing of Domestic Product Form. 第 3 部では、ここでいう CDS 文書を畜養活け込み様式、畜養移送様式、漁獲モニタリング様式、漁獲標識様式、及び再輸出又は国産品水揚げ後の輸出様式と規定している。

⁸ A State/Fishing Entity that has expressed its commitment, in writing, to cooperate with the CDS Resolution. CDS 決議への協力を確約することを書面にて表明した国／漁業主体

The Secretariat raised these concerns with New Zealand in November 2023. New Zealand responded stating that the company in question “*had been in contact with Fisheries NZ (and the Secretariat) for some time around their desire to process SBT in Vietnam and re-export to the domestic NZ market. Fisheries NZ have been clear with the company that validated REEF forms would be required to reimport SBT, and that Vietnam becoming an OSEC would facilitate this. Despite our best efforts, Vietnam has not yet become an OSEC*”.

事務局は、2023年11月にこれらの懸念点をニュージーランドに対して提起した。ニュージーランドは、関係する企業が「複数回にわたり、ベトナムでSBTを加工しニュージーランド国内市場向けに再輸出したいとの希望をめぐってNZ漁業当局（及び事務局）に接触していた。NZ漁業当局は、同企業に対し、SBTに再輸入には確認されたREEF様式が必要であること、またベトナムがOSECになることでそのことが促進され得ることを明確化した。これまで最善の努力を尽くしてきたところであるが、ベトナムはまだOSECとはなっていない」とした。

New Zealand also subsequently confirmed that the imported quantities of SBT from Viet Nam totalled 19,060kg (gross weight) during the 2022/2023 season.

またニュージーランドは、その後、2022/2023年漁期にベトナムから輸入されたSBTの数量は合計19,060kg（原魚重量）であったことを確認した。

South Africa **南アフリカ**

The Secretariat has noted to previous Compliance Committees that South Africa had extensive submission and quality issues with its CDS data for 2017 to 2022 inclusive. Most of these issues continued in 2023, however there were some improvements in 2023 also.

事務局は、昨年の遵守委員会において、2017年から2022年までの期間における南アフリカのCDSデータにはその提出及び品質に相当の問題があったことを指摘した。これらの問題の大部分は2023年も継続しているものの、いくらかの改善も見られる。

Attachment A provides summary information for South Africa’s 2023 CDS issues including for example that:

2023年における南アフリカのCDS問題の概要は別紙Aのとおりであり、例を挙げると以下のとおりである。

- For the past six fishing seasons data submitted from different sources have not reconciled, however updated CDS data submitted by South Africa in recent months has appeared to show improved correlation (refer Table 1 below and **Attachment D**). 過去6漁期に関して提出されたデータは別のデータソースの情報と合致していなかったが、直近の数ヶ月に関して南アフリカから提出された更新CDSデータは相関性が改善しているようである（下表1及び別紙Dを参照）。
- The correlation between SBT numbers recorded in amended CTF data and on CMFs has improved for 2023, however there were still over 9% of CMFs submitted that either did not match the specified tagging form details or where the number of SBT differed between CTF and CMF.

2023年の修正CTFデータに記録されたSBTの個体数とCMFに記載されたSBT個体数との間の相関性は改善しているが、それでも提出されたCMFのうち9%以上において対応する漁獲標識様式の詳細と一致しないか、又はCTFとCMFの間でSBT個体数に相違がある。

- A large proportion of South Africa’s CMFs (89 CMFs, *i.e.* 18%) were not submitted by 31 March 2024 (which was the final due date for all 2023 CDS submissions). These forms were provided in early August 2024, following resubmission of all of South Africa’s 2023 tagging data in July 2024.
 相当数の南アフリカの CMF (89 件、すなわち 18 %) が 2024 年 3 月 31 日 (全ての 2023 年 CDS 様式の最終提出期限) までに提出されなかった。これらの様式は 2024 年 8 月初旬に提出され、さらに 2024 年 7 月に南アフリカの 2023 年における全標識データが再提出された。
- There were 35 instances of missing catch validation information (name, signature, seal of date) on CMFs submitted.
 提出された CMF のうち 35 件において漁獲物の確認に関する情報 (確認者の氏名、署名、日付印) の欠落があった。
- There continue to be discrepancies between South Africa’s CMF tagging data and total estimated catch, however some issues appear related, at least in part, to the conversion factor applied to SBT on CMFs.
 南アフリカの CMF 標識データと総推定漁獲量との間には依然として差異があるが、CMF に記載された SBT に適用される変換係数がこの差異の原因の少なくとも一部となっているようである。
- Duplicate form numbers continue to be issued, which is a non-compliance issue under the CDS Resolution. The Secretariat identified 15 duplicate CMF numbers which were issued during the 2023/24 season. These forms were renumbered in later data submissions to overcome this issue.
 依然として様式番号が重複して発行されており、これは CDS 決議違反である。事務局は、2023/24 年漁期において 15 件の CMF 番号の重複を確認した。この問題を解決するため、これらの様式には後のデータ提出時に番号の振り直しが行われた。

In summary, South Africa’s resubmitted data shows improved correlation in some areas, but some quality issues remain, in addition to the late or incomplete submission of CDS data. 概して、南アフリカから提出されたデータは一部の分野においてその相関が改善してきたものの、依然としてデータの品質にはいくらかの問題があり、さらに CDS データの遅延又は不完全な提出が継続している。

Table 1: Data Submitted on the Number and Estimated Whole Weight of SBT Submitted by South Africa for the 2022 Fishing Season (as at 18/09/2023)

表 1 : 1 : 2022 年漁期に関して南アフリカから提出された SBT の尾数及び推定原魚重量に関するデータ (2023 年 9 月 18 日時点)

Type of data based on: 基礎となるデータの種類 :	Number of SBT in Data Submitted to Secretariat 事務局に提出されたデータにおける SBT の個体数	Comment コメント	Estimated Whole Weight (t) based on Data Source 当該データベースに基づく原魚重量 (トン)
Catch by fleet data 船団別漁獲量データ	1456		108.71
Monthly Catch Report 月別漁獲報告	Not applicable		109.22
Carry-Forward Notification 繰越通知	Not applicable		109.1
National Report to CC CC に対する国別報告書	Not yet available		Not yet available
CMF data CMF データ	1,438		159.78 ⁹
CTF data CTF データ	1439		123.23 ¹⁰

Taiwan

台湾

Taiwan notified two new validation seals that were authorised to be used from 1 August 2023. However, a small number of CMFs were submitted that used this validation seal prior to the authorisation date.

台湾は、2023 年 8 月 1 日以降に使用することが許可された 2 件の新たな確認印を通知した。しかしながら、許可期間の開始前から、一部少数の CMF にこの確認印が使用されていた。

7. National Reports

国別報告書

The EU did not submit National reports to ERSWG 14, ESC 27, ESC 28 and ESC 29. ESC 28 noted that:

EU は ERSWG 14、ESC 27、ESC 28 及び ESC 29 に対して国別報告書を提出しなかった。ESC 28 は以下のとおり留意した

“... the ESC has not accepted the EU’s reasoning for not submitting its national report. The ESC also stated that the information in the EU report would be beneficial in the context of supporting the work aimed at estimating UAM.” [UAM is unaccounted mortality].

「…ESC は、EU が国別報告書を提出しないとした理由を受け入れていない。また ESC は、UAM (未考慮死亡量) の推定を目的とする作業に資するという文脈において

⁹ This estimated whole weight applies the conversion factor of 1.8 for SBT processed to DRO, which was applied to more than 90% of SBT on CMFs submitted by South Africa. South Africa have indicated they believe this conversion factor is very high and that their preliminary analysis of the data they had collected put the conversion factor at around 1.27. この推定原魚重量は DRO として加工された SBT に変換係数 1.8 を適用したもので、南アフリカから提出された CMF に記載された SBT の 90% 以上にこれが適用されていた。南アフリカは、この変換係数は高すぎると考えており、データの予備的解析では変換係数をおよそ 1.27 に修正したことを示唆している。

¹⁰ Most SBT in tagging data submitted by South Africa is landed GGO, with only around 5% of SBT reported as landed DRO in tagging data. 南アフリカにより提出された標識データ上では大部分の SBT が GGO として陸揚げされており、標識データ上で DRO として陸揚げが報告された SBT は約 5% にとどまる。

て、EU の国別報告書の情報が有益と考えられるとした。 [注：UAM は未考慮漁獲量である]

ESC29 also noted that:

また、ESC 29 は以下に留意した。

“...no national report had been received from the EU. The Chair reiterated the EU’s previous advice that this is because, strictly speaking, as the EU does not have a southern bluefin tuna (SBT) fishery, it does not target SBT, and it has not reported any by-catches of SBT in the relevant reporting period.”

「…EU からは国別報告書を受領しなかった。議長は、厳密に言えばEU にはみなみまぐろ (SBT) 漁業がなく、SBT を漁獲対象としておらず、また関係する報告期間においてSBT の混獲も何ら報告されていないので国別報告書を提出する義務がないとしたEU からの過去の助言を繰り返した。」

South Africa did not submit National Reports to ESC26, ESC27 and ESC 28 (2021, 2022, 2023) nor to ERSWG 14 (2022). However, South Africa did submit national reports to ERSWG15 and ESC 29 (both 2024). South Africa also did not submit its National Report to CC18 / EC30 in 2023, and at the time of finalising this paper has not submitted its national report to CC19 / EC31.

南アフリカは、ESC 26、ESC 27 及び ESC 28 (2021、2022 及び 2023 年) 又は ERSWG 14 (2022 年) に対する国別報告書を提出しなかった。しかしながら、南アフリカは ERSWG 15 及び ESC 29 (いずれも 2024 年) に対する国別報告書を提出した。また南アフリカは、2023 年の CC 18/EC 30 に対して国別報告書を提出せず、また本文書の作成時点において CC 19/EC 31 に対する国別報告書を提出していない。

Paragraph 38(c) of the Transshipment Resolution requires that Members include in their annual report a “comprehensive report assessing the content and conclusions of the reports of the observers assigned to carrier vessels which have received at-sea transshipments from their LSTLVs during the most recently completed fishing season”. This information is captured in Section 2.4 (iii) of the national reports.

転載決議パラグラフ 38(c) は、メンバーに対し、それぞれの国別報告書に「前漁期にメンバー又は CNM の旗を掲げる LSTLVs から洋上転載物を受けとった運搬船に配乗されたオブザーバーの報告に関する内容及び結果を評価する包括的な報告書」を含めることを義務付けている。この情報は、国別報告書のセクション 2.4 (iii) で網羅されている。

The Secretariat notes that Members that are transshipping SBT are generally including brief summaries related to observer deployments, rather than the content and conclusions of observer reports. This may sometimes also include a comment on the overall number of infractions detected. The Secretariat encourages Members to also assess and report on the content of transshipment observer reports to ensure they most comprehensively meet this reporting requirement.

事務局は、SBT の転載を行っているメンバーは、概して、オブザーバー報告書の内容及び結論ではなくオブザーバー配乗に関する概要を記載していることを指摘したい。この報告には、検知された違反件数に関するコメントが含まれる場合がある。事務局は、メンバーに対し、ここでの報告内容が本報告要件に包括的に合致するよ

う確保するべく、転載オブザーバー報告書の内容に関しても評価及び報告するよう奨励する。

8. AREAS OF PERSISTENT NON-COMPLIANCE

継続的な非遵守分野

(excluding South Africa's persistent CDS issues mentioned above)

(上述の南アフリカ関連の CDS 問題は除く)

8.1. Minimum Standards for Inspection in Port (South Africa)

港内検査の最低基準 (南アフリカ)

According to the CCSBT's Resolution on Minimum Standards for Inspection in Port:

港内検査の最低基準に関する CCSBT 決議は以下を規定している。

20. *"The port Member shall transmit a copy of the inspection report to the CCSBT Secretariat no later than 14 days following the date of completion of the inspection. If the inspection report cannot be transmitted within 14 days, the port Member should notify the CCSBT Secretariat within the 14 day time period the reasons for the delay and when the report will be submitted."*

「寄港国であるメンバーは、検査の完了から 14 日以内に、CCSBT 事務局に対して検査報告書の写しを送付するものとする。検査報告書を 14 日以内に送付することができない場合、寄港国であるメンバーは、14 日の期間内において、CCSBT 事務局に対し、当該遅延の理由及び当該報告書を提出する時期について通知するものとする。」

For the calendar years 2017 to 2022 inclusive, South Africa did not provide any port inspection reports within the required 14-day timeframe. It also did not provide any of the required notifications regarding the reasons for the delays and information about when the delayed reports will be submitted. In 2023, one port inspection report (of four received) was provided within the required 14-day timeframe. At the time of completing this report it is unclear if all required 2023 port inspection reports have been received as South Africa have, at this point, not submitted their national report. Further details are provided in paper [CCSBT-CC/2410/08](#).

2017 暦年から 2022 暦年までの期間において、南アフリカが 14 日間の提出期限内に港内検査報告書を提出したことはない。また、遅延の理由及び提出が遅れている報告書の提出時期に関する情報に関する通報も行わなかった。2023 年においては、(受領した 4 件のうち) 1 件の港内検査報告書が 14 日の提出期限内に提出された。本報告の作成時点においては南アフリカが国別報告書を提出していないので、提出が義務付けられている 2023 年に南アフリカがこれまで実施した港内検査報告書が受領されたのかどうかは不明である。詳細は文書 [CCSBT-CC/2410/08](#) のとおりである。

8.2. Non-Provision of Import Copies of CDS Forms (Korea)

輸入 CDS 様式の写しの不提出 (韓国)

Missing import documents are a concern because they could be an indicator that the relevant Member has not fully implemented CCSBT's CDS requirements and this could provide an avenue for Illegal, Unreported and Unregulated (IUU) SBT to enter markets.

輸入文書の不提出は、関連するメンバーが全面的に CCSBT の CDS 要件を実施しな

かったことの指標となり得るものであり、また違法、無報告及び無規制（IUU）SBTが市場に流入する抜け道となる可能性があるため、懸念となっている。

Korea has not yet submitted 13 expected CDS import forms for the 2023 calendar year. Korea’s non-submission of a significant number of import copies of CDS forms to the Secretariat has continued since the CDS was first implemented in 2010, however it is encouraging to note that the number and percentage of missing forms in 2023 is lower than it has been in the two preceding years.

韓国は、2023 暦年において想定されている 13 件の輸入 CMF 様式を提出しておらず、2010 年に CDS が初めて施行されて以降、事務局に対して多数の輸入 CDS 様式が提出されない状況が継続しているが、2023 年における未提出様式の割合は過去 2 年よりも低くなったことに留意されたい。

Table 3 provides the number and percentage of import copies of REEFs respectively not submitted by Korea since 2010, as well as the total tonnages of SBT associated with those missing forms.

表 3 は、2010 年以降に韓国から提出されていない輸入 REEF の写しの件数及び割合、並びに不提出の様式に関連する SBT の総トン数を示している。

Table 3: Korea – Missing Import Copies of REEFs

表 3：韓国—不提出となっている輸入 REEF の写しの件数

REEFs	Number Expected to be Submitted 提出が想定されている件数	Number Missing (not submitted) 不提出件数	Percentage Missing 不提出の割合	Total Net Weight (t) of SBT on Missing REEFs 不提出 REEF における SBT の総正味重量
2018	240	15	6.3%	9.69
2019	155	14	9.0%	5.59
2020	121	11	9.1%	7.60
2021	114	19	16.7%	45.05
2022	121	17	14.1%	24.29
2023	118	13	11.0%	12.69

All CMF import forms have been submitted as required since 2020 onwards.

2020 年以降に関しては、必要な全ての輸入 CMF の写しが提出されている。

Regarding non-submission of import forms, Korea has provided the updates below in its last three National Reports.

輸入様式の不提出について、韓国は同メンバーの国別報告書において対応状況を提示している。

In its 2022 National Report, Korea advised that:

2022 年の国別報告書において、韓国は以下を述べた。

“In relation to Korea’s issue with the import copies of CDS documents, the Ministry of Oceans and Fisheries (MOF), National Fishery Products Quality Management Service (NFQS) and Korean Customs Service (KCS) had several consultations including a face-to-face meeting in the 1st semester of 2022. To improve the communication and data exchange among MOF, NFQS and KCS, it was agreed that they would meet periodically to crosscheck their respective records and take follow-up actions.

「輸入 CDS 文書の写しに関する韓国の問題について、海洋水産部（MOF）、国立水産物品質管理院（NFQS）及び韓国関税庁（KCS）は、2022 年第 1 四半期に対面会議

を含む複数回の協議を行った。MOF、NFQS 及び KCS の間の意思疎通を改善するため、それぞれの記録を相互にチェックしフォローアップを行うべく定期的に会合することが合意された。

In the meantime, the NFQS has been providing awareness program to SBT importers in Korea regarding CDS requirements and the MOF is working to establish a more effective national procedure. As the key to the issue, the amendment of Distant Water Fisheries Development Act has been considered so far but some doubts and questions were raised on this approach repeatedly. In any case, the MOF initiated the process of amending the current Ministerial Directive on the Implementation of CCSBT CDS Resolution in order to require the SBT importers to submit the copies of CDS documents to the NFQS directly, and will do its best to complete the process before the start of next fishing season although the Directive is not a legally binding instrument in a strict sense.”

現在は、NFQS が韓国国内の SBT 輸入業者に対して CDS 要件に関する啓発プログラムを実施しており、また MOF はより効果的な国内手続きの策定に取り組んでいるところである。この問題の鍵として、これまでは遠洋漁業開発法の改正が検討されてきたが、このアプローチには幾度も疑義が呈されてきたところである。いずれにせよ、MOF は、厳密には省令は法的拘束力を有する文書ではないものの、輸入業者に対して CDS 文書を NFQS に直接提出するよう求めるべく現行の CCSBT CDS 決議の実施に関する省令の改正プロセスを開始しており、次の漁期の開始前にこのプロセスを完了させるべく最善を尽くす所存である。」

In its 2023 National Report, Korea advised that:

2023 年の国別報告書において、韓国は以下を述べた。

“In relation to Korea’s issue with the import copies of CDS documents, the Ministry of Oceans and Fisheries (MOF), National Fishery Products Quality Management Service (NFQS) and Korean Customs Service (KCS) continued consultations to improve the communication and data exchange.

「輸入 CDS 文書の写しに関する韓国の問題に関して、海洋水産部 (MOF)、国立水産物品質管理院 (NFQS) 及び韓国関税庁 (KCS) は、相互の意思疎通及びデータ交換を改善するための協議を継続している。

Although the progress has been somewhat slow as there are practical challenges in improving coordination and collaboration among different Ministries and Agencies, we recently invited the Ministry of Food and Drug Safety as well to those consultations and are now using a website to search and exchange the information/data on imported SBT. We will test how well the website works and consider other necessary actions, depending on the result.”

異なる省庁間での調整及び協力の改善には実務上の困難がありその進捗はやや遅れているが、最近においては食品医薬品安全処も協議に招き、輸入 SBT の情報/データを検索及び交換するためのウェブサイトの利用を開始したところである。今後、当該ウェブサイトがどの程度機能するかをテストし、その結果に応じて必要な措置を検討する予定である。」

In its 2024 National Report, Korea advised that:

2024 年の国別報告書において、韓国は以下を述べた。

“Last year, “frozen SBT” was designated as one of the imported fish species that are subject to the “Import/Transaction History Management System” requirements. In this system, certain information/data of the imported fish products is required to be compiled and stored in a database which can be accessed by authorized officers of the MOF, NFQS, KCS and

MFDS. This system was developed in addition to Korea's existing SBT CDS management regime which does not have specific provisions in relation to data/information sharing and exchange arrangements among the relevant Ministries and agencies, and does not replace it.

「昨年、「冷凍 SBT」は「輸入／取引履歴管理システム」要件の対象となる輸入魚種の一つに指定された。同システムでは、輸入水産物にかかる特定の情報／データをデータベースに集計及び保存することが義務付けられ、MOF、NFQS、KCS 及び MFDS の権限を付与された担当間がこれにアクセスすることができる。同システムは韓国の既存の SBT CDS 管理体制に追加する形で開発されたもので、関連省庁間でのデータ／情報共有及び交換の取決めに関する特別な規定を有するものではなく、またそれに置き換わるものでもない。

It is expected that we should be able to locate the CDS of imported SBT and submit them to the Secretariat in a more systematic and timely manner using the system, and we will make further improvements and refinements, if necessary, after our experience with the system for one year or two.

このシステムを用いることにより、より体系的かつ適時的に輸入 SBT にかかる CMF を特定し事務局に提出できるようになるものと考えており、今後数年間における当システムを用いた経験を踏まえ、必要に応じてさらなる改善及び精緻化を図っていく予定である。

In any case, we will continue our effort to rectify the situation and hope that the eCDS that CCSBT will be implementing would also assist us in one way or another in dealing with this issue.”

いずれにしても状況を改善するための努力を続けていく考えであり、CSBT が導入を予定している eCDS が何らかの形でこの問題への対応に資することを期待する。」

Prepared by the Secretariat
事務局作成文書

Table 1: Compliance with Measures

	Australia	European Union	Indonesia	Japan	Korea	New Zealand	South Africa	Taiwan	
CDS (during 2023 Calendar year): Continued	% of CMFs for Exports where catch/ harvest <u>weights</u> are the same on both exporter and importer copies ¹⁷	100%	n/a	100%	n/a	100%	99.6%	97.95%	100%

Key to Colour Coding in the Attachment A Table	Colour
Items with a tick or a score greater than 90% and that have no duplicate tag number or authorisation issues are un-coloured	
Items categorised as 'F', or a score between 50 - 89.9% and that have no duplicate tag number or authorisation issues	
Items categorised as 'P' or 'X' or a score less than 50%, and/or items that have tag number duplication or authorisation issues	

Table 2: Number of CMFs and REEFs from which the CDS Data Percentages in Table 1 of Attachment A were Derived

i)

CDS Data Submission Period	Number of CMFs on the CDS System for each Member/ CNM									Total Number of CMFs
	Number of CMFs on the System	Australia	Indonesia	Japan	Korea	New Zealand	Taiwan	South Africa	European Union	
2023	Domestic Landings CMFs	1,351	777	86	2	245	30	105	n/a	2,596
2023	Export CMFs	667	97	0	9	739	52	391	n/a	1,955
2023	TOTAL CMFs	2,010	874	86	11	984	82	496	0	4,551

ii)

CDS Data Submission Period		Number of REEFs on the CDS System for each Member/ CNM								Total Number of REEFs
		Australia	Indonesia	Japan	Korea	New Zealand	Taiwan	South Africa	European Union	
2023	Number of REEFs on the System	43	553	262	9	0	1	0	0	868

- ✓ - For Data, CDS and Minimum Standards for Port Inspection requirements - Indicates Full compliance where the total number of days outside the due date was less than or equal to 28 days (when added together for the entire period)
- For Members Reports – Indicates that reports contained all information as required by the template
- For Authorised Vessels/Farms – indicates that data has been received and there is no evidence of periods of non-authorisation
- F - For Data, CDS and Minimum Standards for Port Inspection requirements - Indicates Full compliance but the total number of days outside the due date was greater than 28 days (when added together for the entire period)
- For Members Reports – Indicates that reports contained partial information on all aspects of the template
- For ERS – indicates that a plan is 'Under Development'
- For Authorised Vessels/Farms – indicates that full information has been received, however there has been some period of non-authorisation
- P - Indicates partial compliance (not all data received or no advice provided for a part of the period)
- For Transhipments – a 'P' means that either not all data was received or no advice was provided, including receiving deployment requests for which no transhipment of SBT by a fishing vessel is indicated, but then did occur
- For Members Reports – indicates that report did not contain all of the information specified in the template
- For Authorised Vessels/Farms – indicates that full information has not been received, and one or more Fishing Vessels were not authorised while fishing
- For validators – indicates that one or more validators were not authorised when they validated CDS forms
- X - Indicates non-compliance (no data received, or no advice provided)
- For ERS – indicates non-implementation of measure, or no advice provided
- n/a - Not Applicable
- tba - To be advised
- ? - Unknown

¹ The EU had no SBT catch for 2023 and therefore there are no final catch by vessel, scientific data exchange data, or ERS data that need to be submitted by the EU.

² South Africa provided their initial allocation for the 2024 season on 8 August 2024, 160 days after the season started and 99 days after this data was required to be provided to the Secretariat.

³ South Africa provided their catch by vessel information for the 2023 calendar year on 30 April 2024 and this was updated on 1 July 2024, following a review of their 2023 data. This information is equivalent to the final catch by vessel information required as part of the initial allocation vs final catch requirements.

-
- ⁴ For Scientific Data and ERSWG Exchange, this table records whether the required information due between 1 August 2023 and 31 July 2024 has been received by the Secretariat. This is a slightly different time period than many items in this table but allows the Secretariat to report whether all data exchange items required to be submitted for the 2022 calendar year have been provided.
- ⁵ Korea submitted length data but has not provided raised length data.
- ⁶ Japan advised that it has no direct age data to submit to the 2024 Data Exchange. The most recent direct age data Japan submitted were for 2018, however data are required to have been submitted for at least the 2021 calendar year.
- ⁷ This category monitors the provision of other agreed primary data items for specific Members including catch at age, non-retained catches, CPUE indices, troll indices and historical catch and effort.
- ⁸ 8 CMFs for catch in 2023 were submitted to the Secretariat in June 2024.
- ⁹ Indonesia has not submitted nine (9) CMFs for small scale/artisanal catch that were recorded in tagging data received late (in March 2024) and relates to catch taken between January and November 2023..
- ¹⁰ Missing CMFs for 2023 (73 forms) were submitted late, in early August 2024, after follow-up from the Secretariat. After reconciliation of this data, based on revised CTF data received, seven (7) CMFs remain missing at the time this paper was completed.
- ¹¹ All CMF's submitted by South Africa were compliant CMFs, however there are seven (7) CMF's that the Secretariat has not received from South Africa which are unable to assessed, and South Africa submitted 15 CMFs with duplicate number for SBT caught in 2023.
- ¹² While compliant CMFs were submitted by Australia, four TIS (Trade Information Scheme) forms were submitted for re-exports, and these were phased out by 31 Dec 2009. These forms were subsequently reissued on compliant REEF forms.
- ¹³ While all South Africa's validators were correctly authorised to validate on their 2023 CMFs submitted, there were also other validation issues with CMF's submitted, including 26 missing validation seals, 3 missing validator signatures, 3 missing validator name and 3 missing catch validation date.
- ¹⁴ Incomplete/inaccurate information includes things such as missing information for one or more fields and incorrect information such as invalid codes/conversion factors etc. Therefore, the figures in the table include CMFs that:
- contain a vessel which wasn't authorised on the catch/harvest date
 - contain a validator who wasn't authorised on the validation date
 - were not submitted to the Secretariat by the exporter (but the Secretariat has already received a copy from the importer).
- These figures in the table do not include CMFs that contain only tagging data errors. All tagging data error statistics are provided in separate rows of the table.
- ¹⁵ The errors were all that statistical area for High Seas transshipment was not provided. The Secretariat has advised Indonesia of this issue.

-
- ¹⁶ There was 1 New Zealand fishing vessel (recorded on 1 CMF) that was unauthorised when it caught 1 SBT during July 2023. This vessel was subsequently retrospectively authorised.
- ¹⁷ Variation from 100% means that export and import versions of the CMF have different values. This may be caused by situations such as the following:
- the export CMF was altered after the initial export, but the importer (and so the Secretariat) did not receive copies of the updated export CMF, or
 - the export CMF was altered after the initial export, and updated copies were sent to the importer, but the Secretariat received the original and not the updated copies back from the importer.
- ¹⁸ South Africa noted that much of their SBT are landed in GGO (CTF) and exported in DRO (CMF). They felt that the 1.8 DRO conversion factor was very high and that their preliminary analysis of the data they had collected put the conversion factor at around 1.27. They stated that whilst 1.8 is used, the “% of CTFs where fish weights within 5% CMF” will reflect a poor result in the Compliance with Measures table. The Secretariat has run some initial analysis and from this it appears that the use of this conversion factor is contributing to the high percentage of mismatches. However, there also remain some issues with data inconsistencies that also contribute to this.
- ¹⁹ South Africa provided all missing export CMFs in the data submitted to the Secretariat in early August 2024.
- ²⁰ The intended importing State/Entity is assumed to be the export destination specified on the CMF or REEF; however, the Secretariat recognises that it is possible that, in some cases, the shipment’s actual export destination may change at shipping time and may therefore sometimes differ from the intended export destination.
- ²¹ All 2023 importer copies of REEFs (3 in total) late on 19 July 2024, after follow-up from the Secretariat. Australia informed the Secretariat that they are taking steps to improve their domestic regulation to improve compliance with the requirements for the provision of this import data.
- ²² South Africa resubmitted their 2023 catch tagging data on 23 July 2024. There had previously been one duplicate tag number in CTF data submitted to the Secretariat, but this duplicate was not present in the resubmitted data.
- ²³ At-sea transshipments of SBT to Indonesia’s wooden CVs with its own national observers on board were not permitted under CCSBT’s Transshipment Resolution until 1 November 2023 but did occur. To date, no deployment requests were received by the CCSBT or IOTC for the period 1 Jan 2023 to 31 Oct 2023. The CCSBT began its 2-year trial at-sea transshipment programme with Indonesia on 1 Nov 2023 – a total of 18 deployment requests have been provided for November and December 2023.
- ²⁴ Of the 18 deployments notified for 2023, transshipment declarations (TDs) were completely missing for 11 of these deployments (61%). In the case of the other seven (7) deployments, transshipment declarations were provided, on average, 21 days late. Transshipment declarations are required to be provided to the Secretariat within 24 hours of the completion of the transshipment by the master of the receiving Carrier Vessel.
- ²⁵ According to the CCSBT’s ‘Resolution on Establishing a Program for Transshipment by Large-Scale Fishing Vessels’, the master of a receiving Carrier Vessel is required to complete and transmit a CCSBT Transshipment Declaration to the CCSBT Secretariat within 24 hours of the completion of the transshipment. This provision came into effect on 1 January 2015.

-
- ²⁶ Indonesia did not provide any information for section 2.4iii. of the CC/EC report (SBT Transshipment) other than noting that the observer report for at-sea transshipments during the 2022 season was in process for submission to the IOTC. The Secretariat has communicated with the IOTC Secretariat which advised that, at the time of finalising these tables, it does not have the observer reports for nine (9) of the eighteen (18) deployments notified to the CCSBT Secretariat for 2023.
- ²⁷ Members provided some comments, however a comprehensive report including an assessment of the content and conclusions of the reports of the observers assigned to carrier vessels which received transshipments from their tuna longline fishing vessels with freezing capacity (LSTLVs) was not provided.
- ²⁸ Section 2.4iii of Taiwan's CC/EC report contained no information on the conclusions of observers onboard Taiwan's carrier vessels (e.g. reported infractions or issues or lack thereof), and only contained metrics on the number of transshipments and the number of vessels involved.
- ²⁹ The ID CC/EC report did not contain details of the type of audits undertaken in accordance with Section 5.8 of the CDS Resolution to validate the information contained in the CDS documentation. The report also notes the number of vessels required to report to VMS in 2022 that was lower than those ID flagged vessels on the CCSBT Record of Authorised Vessels during 2022. However, there is no explanation of whether these vessels were operating only within areas under national jurisdiction and, if so, what monitoring they were subject to.
- ³⁰ There was very little detail included in Taiwan's CC/EC report in Section 2.7 - Coverage and Type of CDS Audit Undertaken. However, sufficient information was captured in other areas of the report to meet this requirement. Section 2.4iii of Taiwan's CC/EC report also contained no information on the conclusions of observers onboard Taiwan's carrier vessels (e.g. reported infractions or issues or lack thereof), and only contained metrics on the number of transshipments and the number of vessels involved. However, this has been included in the compliance assessment for Transshipment (see bullet point 26) so has not been duplicated here.
- ³¹ At ESC27 Members agreed that EMS activities should be reported to the ESC in Member's National Reports. The agreed EMS information should include how EMS has been implemented, particularly in the context of the CCSBT Scientific Observer Program, how observer coverage has been calculated, what information previously collected by human observers is no longer collected and what information cannot be collected by EMS. Australia did not provide the agreed EMS information requested by Members in their report to ESC28. In addition, some catch and effort data was merged or not completely reported.
- ³² Paragraph 11 of the report of ESC 28 notes that, "*the ESC has not accepted the EU's reasoning for not submitting its national report. The ESC also stated that the information in the EU report would be beneficial in the context of supporting the work aimed at estimating UAM.*" [UAM is unaccounted mortality]. The EU had previously advised (30 July 2022) that, "*We have taken the decision to discontinue the submission of the ESC report to CCSBT as strictly speaking we do not have a SBT fishery, we do not target SBT and we have not reported any by-catches of SBT in the relevant reporting period.*" In response to a query from Members following the conclusion of CCSBT 30, the EU further stated that "*in the past the EU provided, on a voluntary basis, a report to the ESC on our tropical tuna fisheries. However, the ESC report is, strictly speaking, only applicable to Members with SBT fisheries. The ESC report deals with the specificities of the SBT fishery and provides advice on SBT management and ecologically related species. A report on tropical tunas is of little, if any, value to the ESC.*" In their response the EU further stated "*The EU has been compliant with the obligation to submit the annual report for the Compliance Committee and the Extended Commission. Nevertheless, as noted above, the EU does not have a SBT fishery. Consistent with this, there should no expectation that the EU's annual report will address the parts of the report directly related to the SBT fishery.*" In their response to the draft tables provided to Members before CC19, the EU again reiterated their position that they felt that this should be assessed as not applicable.

I. Mortalities Attributed Against Total Available Catch Limit for the “2018 Season” to the “2023 Season”
(all Sources of Mortality must be Attributed Against Members’ Total Available Catch Limit)

Key:

 Cells highlighted in lemon indicate where CDS estimates of the fishing season’s catch are higher than the nationally reported retained commercial catch by more than 0.5t

 Cells highlighted in pale green indicate that the reported total attributed mortalities for the fishing season were greater than the Total Available Catch Limit, but the overcatch was paid back by a voluntary reduction of allocation in the following season

 Cells highlighted in pale red indicate that the reported total attributed mortalities for the fishing season were greater than the Total Available Catch Limit and the overcatch was not paid back or has not yet been paid back/is in the process of being paid back

‘n/a’ Means ‘not applicable’

Note: No over-catches were recorded for the “2018” season.

Over-catches were recorded for Australia and Indonesia in the “2019” season, but Australia’s over-catch has already been paid back.

One over-catch was recorded for the “2020” season by Indonesia adding to its over-catch in the “2019” season. These over-catches are to be paid back between 2022 – 2026.

II. Mortalities Attributed Against Total Available Catch Limit for the “2010 Season” to the “2017 Season”¹⁶
(all reported retained commercial catch was attributed against Members’ Total Available Catch Limits; Members defined whether other sources of Mortality were attributed against their Total Available Catch Limit)

Key:

 Cells highlighted in orange/gold below indicate where CDS estimates of the fishing season’s catch were higher than the nationally reported retained commercial catch by more than 0.5t

 Cells highlighted in pale green indicate that the reported total attributed mortalities for the fishing season were greater than the Total Available Catch Limit, but the overcatch was paid back by a voluntary reduction of allocation in the following season

 Cells highlighted in pale red indicate that the reported total attributed mortalities for the fishing season were greater than the Total Available Catch Limit and the overcatch was not paid back

‘n/a’ Means ‘not applicable’.

-
- ¹ This figure uses the farm stocking form data which is based on an average weight of fish taken from 100-fish sample within a cage.
- ² The 2018/19 allocation reflects the voluntary transfers of 21t that Japan is providing to Indonesia, and 27t that Japan is providing to South Africa for the 2018 to 2020 quota block.
- ³ South Africa originally noted it was carrying forward 36t in its letter dated 23/02/18, but then subsequently decreased the amount carried forward to 32.352t in its letter of 18/09/18.
- ⁴ Taiwan advised that the cases where its reported catches are lower than the CDS estimate are due to CDS weights being measured at sea, which are not as accurate as its landed weight measurements (which are lower). According to Taiwan's regulations, fishers are requested to report landed weight after the sale of the catch relating to each document. Taiwan advised that the landed whole weight was not higher than its reported catch.
- ⁵ In its 2020 carry-forward letter Australia advised that, "*Combining the commercial catch and recreational allowance resulted in a total mortality of 6,324,135 which is an overcatch of 40,291 kg In accordance with the Corrective Actions Policy, Australia intends to repay this amount by reducing catch available for the 2020 fishing season by the same amount.*"
- ⁶ In its 2020 carry-forward letter Indonesia advised that, "*As the final catch of Indonesia for the 2019 fishing season is 1,206,034 Kgs and exceeds the national allocation, Indonesia intends to compensate (payback) the over-catch by reducing its national allocation for 2020 fishing season by 181,916 Kgs.*"
- ⁷ The carry-forward for South Africa was limited to 84.6t due to paragraph 4 of the carry-forward Resolution, which limits the total available catch for the next quota year to be a maximum of the national allocation for that year (423t) plus 20% of its national allocation (0.2*423t) for the previous year, which comes to 507.6t.
- ⁸ Various estimates of commercial catch have been reported for South Africa for the 2019/20 season ranging between 160.45t in its catch by fleet data, 173.4t in its National Report to CC15 and 172.07t in its monthly catch report data and carry-forward letter.
- ⁹ This figure was updated in 2022 just prior to the CC17 meeting to take into account CMFs which included SBT caught in the 2020/21 season but which were not validated until 2022 and therefore not received by the Secretariat until late 2022.
- ¹⁰ These figures reflect: (1) voluntary transfers of 21t that Japan is providing to Indonesia and 27t that Japan is providing to South Africa for the 2021 to 2023 quota block; (2) a voluntary transfer of 7t that Australia is providing to Indonesia for the 2021 to 2023 quota block; and (3) a special temporary allowance of 80t to Indonesia for 2021 and 2022.
- ¹¹ This CDS estimate was manually adjusted down by 1.245t by the Secretariat to account for Korea being unable to retrospectively adjust its CMF where 3,528kg of SBT was incorrectly recorded with a processed code of DRT (and conversion factor 1.8) when the product was actually HGT with a conversion factor of 1.4106.
- ¹² The carry-forward for South Africa was limited to 84.6t due to paragraph 4 of the carry-forward Resolution, which limits the total available catch for the next quota year to be a maximum of the national allocation for that year (428.3t) plus 20% of its national allocation (0.2*423t) for the previous year, which comes to 512.9t.

¹³ As part of its agreed Payback Plan for its SBT over-catch of 456.584t in 2019/20, Indonesia is paying back 91.3t per year between 2022 to 2026 inclusive

¹⁴ The carry-forward for South Africa was limited to 85.66t due to paragraph 4 of the carry-forward Resolution, which limits the total available catch for the next quota year to be a maximum of the national allocation for that year (428.3t) plus 20% of its national allocation (0.2*428.3t) for the previous year, which comes to 513.96t.

¹⁵ Data from monthly catch reports are only available for catches up until the end of July 2024.

¹⁶ The information in this part of the attachment takes into account that South Africa did not accede to the Convention by 31 May 2013/14/15, and therefore there was 40t of additional quota that was allocated between Members for the 2013 - 2015 TAC years.

¹⁷ In order of preference, the following information sources were used, (but with most recent data reports taking highest preference regardless of the order below):

- OL – Official Letter
- CC – National Reports to the Compliance Committee
- CF – Carry-forward Notification
- ESC – National Reports to the Extended Scientific Committee
- ERSWG – National Reports to the Ecologically Related Species Working Group
- DE – Data Exchange.

¹⁸ Australia originally carried forward 35,724kg of unfished quota from the 2015 quota year as advised on 29 January 2016, but this amount was subsequently revised to 37,715kg on 18 July 2016.

¹⁹ Australia's allocation for the 2014/15 year was 5,665t. In its 2015 annual report to the CC/EC Australia advised that it had exceeded its 2013/14 fishing season allocation (by 107.2t) and that it had consequently voluntarily reduced its 2014/15 allocation by 108t, giving it a reduced allocation for 2014/15 of 5,557t.

²⁰ Australia's original allocation for the 2013 fishing season was 4,698t. When South Africa didn't accede to the Convention by 31 May 2013, Australia's allocation for the 2013 season became 4,713t. Australia advised that it had exceeded its allocation for the 2012 fishing season by 34.6t. In accordance with the Corrective Action Policy, Australia then voluntarily reduced its allocation for the 2013 season by the previous season's over-catch of 34.6t, resulting in its 2013 allocation of 4,678.4t.

²¹ The official letter (OL) from Australia relating to its carry-forward (Circular #2014/040) noted a slightly higher catch (4,539.1t) for the 2012/13 fishing season than the catch figure (4,538t) for 2012/13 that was provided in Australia's National Report to the CC/EC.

²² On 25 January 2012 (see CCSBT Circular #2012/002), Australia advised that it had exceeded its 2010 and 2011 fishing seasons allocation by 19.07t and that it had consequently voluntarily reduced its 2012 allocation to 4,508.93t in accordance with Compliance Policy Guideline 3 (Corrective Actions Policy).

-
- ²³ CCSBT17 decided that that the TAC allocation decided at CCSBT 16 was to be considered a 2 year total TAC, and could be distributed across the two year period, with unused catch from the first year carried forward to the second year.
- ²⁴ The EU over-caught its allocation by 0.8t in 2010. While it did not officially advise CCSBT that this over-catch was paid back by any voluntary reduction of its quota allocation in the following year (2011), its low catch of only 3.3t in 2011 equates to the EU having effectively paid back its small 2010 overcatch.
- ²⁵ Indonesia's combined 2010-2011 reported catch was updated from 1,477.9t to 1,494t at CC10.
- ²⁶ Indonesia, in cooperation with the Secretariat, re-counted its 2010 and 2011 monthly catches and applied conversion factors to convert net weights to whole weights (previously monthly and annual catch weights had been provided as processed weights). This resulted in Indonesia's 2010 and 2011 annual catch estimates increasing from 471t to 635.5t, and from 673t to 839.27t respectively. Indonesia subsequently provided another small update to its 2011 reported catch (it increased slightly to 842.4t) in its report to CC/EC, therefore giving a revised 2011 reported catch total of 1477.9t.
- ²⁷ The weight recorded in this cell (4,564t) is the catch retained by Japan's commercial fishing fleet and does not include the estimated 34t of discards/ releases that Japan counted against its total available catch limit for 2017/18.
- ²⁸ The weight recorded in this cell (4,708t) is the catch retained by Japan's commercial fishing fleet and does not include the estimated 45t of discards/ releases that Japan counted against its total available catch limit for 2016/17.
- ²⁹ This figure was increased by approximately 34t as the result of a previously missing CDS form being filed in late 2016.
- ³⁰ The effective catch limits for Japan and New Zealand agreed at CCSBT 16 were 2,261t and 709t respectively. The figures shown here include a 139t transfer from New Zealand to Japan.
- ³¹ The weight recorded in this cell (1,106.6t) is the catch retained by Korea's commercial fishing fleet and does not include an additional 5t that was allowed for discards/ mortalities and also attributed against Korea's total available catch limit for 2017/18.
- ³² Each year some of NZ's allocation is allocated to recreational and customary catch as well as to 'other sources of mortality'. In order to make the figures in this table directly comparable with CDS estimates, weights recorded in these cells do not include allowances for any recreational or customary catch, or other sources of mortality.
- ³³ 2017 was the first year that the Secretariat received advice from South Africa (in its carry-forward letter), that South Africa's large pelagic longline fishing season was and always has been from 1 February until 31 January in any year. The Secretariat has not changed the date ranges of South Africa's past fishing seasons, but has commenced reporting on a February to January season for South Africa from 2017 onwards. This has resulted in January 2017 being omitted from South Africa's summary table. However, this does not result in any missing catch data because South Africa reported no catch for January 2017.
- ³⁴ South Africa provided revisions to its total catch by fleet data for each year between 2005-2015 inclusive for the 2016 Scientific Data Exchange. Reported catches (in whole weight) for the period 2010 – 2015 inclusive had previously totalled to 330.2t. Taking into account the revisions provided during the Data Exchange process, reported catches for that same period now total 414.6t, and the recorded overcatch for that period has approximately doubled to 174.6t.

³⁵ This figure includes a total of 2.3t of exports recorded on CDS forms that have been reported as fraudulent by South Africa.

³⁶ Taiwan allocated 10t from its national allocation to cover releases and discards in 2016/17 and 2017/18. In order to make the figures in this table directly comparable with CDS estimates, the weights recorded in these cells do not include the 10t that Taiwan allocated for releases and discards.

³⁷ An adjustment to Taiwan's 2015/16 monthly catches was received by the Secretariat on 01/09/16.

Characterisation of Global Fisheries for Southern Bluefin Tuna

Includes: (A) Catching Sector, (B) Transporting / landing, (C) Markets, and (D) Monitoring

(A) Catching Sector (2023 calendar year)

Domestic Catch	Catch (t) (from Scientific Data Exchange Data)	No. of vessels ¹	Size of authorised vessels in Fleet ²
Domestic Waters Catch			
Australia <i>(all methods except purse seine)</i> ³	1,349.4t	41	17.3m average (6.1m – 25.3m)
Australia <i>(purse seine)</i>	4,500.8t	6	35.17m average (27.4m – 45.5m)
Indonesia	1,031.3	227 ⁴	24.3m average (13m – 35m)
New Zealand ⁵	1,102.8t	35	27.5m average (7.5m – 104.5m)
South Africa <i>(all methods except pole and line)</i>	108.7t	23	25.6m average (19.6m – 35.9m)
South Africa <i>(pole and line)</i>	0.4t	4	13.3m average (12.65m – 13.85m)
Recreational			
Australia	For its 2022/23 season (Dec 2022 – Nov 23), Australia set aside 311.9t to account for recreational mortality.		
New Zealand	NZ's recreational charter fleet has compulsory reporting. For its 2022/23 (Oct 2022 – Sep 23) season, NZ's best estimate of its recreational catch is 69.3 tonnes.		
High Seas Catch			
High Seas Catch			
EU	0t	None	N/A
Japan	6,335.0t	71	50m average (38.6m – 57.2m)
Korea	1,305.0t	9	49.5m average (47.5m – 51m)
Taiwan	1,135.0t	53	43.4m average (32.9m – 57.6m)

¹ The figures indicate the number of vessels which actually caught and retained SBT during the 2023 calendar year and based on CDS documents provided to the Secretariat to date

² Represents the size range of vessels that actually caught SBT, *i.e.* not the size range of all authorised vessels in the fleet

³ Fishing methods include long-lining, pole and line, rod and reel and trolling

⁴ The catch by fleet data submitted by Indonesia lists 235 vessels that caught SBT in 2023, including 227 longline vessels. CMF documents received by the Secretariat record 227 catching vessels, however CTF data received from Indonesia records another nine (9) small scale/artisanal vessels that caught SBT in 2023, but for which no CMFs have been received at the time of completing this paper.

⁵ Fishing methods included long-lining, mid-water trawling, gill netting and trolling

(B) Transporting / landing (2023 calendar year)

	Australia	EU	Indonesia	Japan	Korea	New Zealand	South Africa	Taiwan
Number of carrier vessels authorised ⁶	0	0	17	17	15	0	0	23
Number of at-sea transshipments ⁷	0	0	578 ⁸	10	0	0	0	37 ⁷
Number of in-port transshipments ⁷	0	0	0	0	7	0	0	3
Main ports: Domestic ⁹	Port Lincoln	None	Benoa (Bali) Jakarta	7 designated ports (Shimizu, Yaizu, Yokosuka, Oigawa, Kushikino, Makurazaki and Yamakawa) ¹⁰	Busan along with 30 other designated ports ¹¹ .	Whangarei, Auckland, Tauranga, Gisborne, Napier, New Plymouth, Wellington, Marlborough, Nelson, Lyttelton, Timaru, Dunedin, and Bluff	9 designated ports (Cape Town, Port Elizabeth, Durban, Port Nolloth, Saldanha, Hout Bay, Hermanus, Gansbaai, Mossel Bay)	Keelung Port, Kaohsiung Port, Chen-Pin Fishing Harbor and Chien-Chen Fishing Harbor
Main ports: Foreign ⁹	N/A	Auckland, (New Zealand), Durban, (South Africa) Papeete (Tahiti, French Polynesia) ¹²	N/A	The designated ports submitted by Members/CNMs: (https://www.ccsbt.org/en/content/ccsbt-register-designated-ports-and-contacts), and 18 foreign ports (Port Louis (Mauritius), Walvis Bay (Namibia), Mahe (Seychelles), Montevideo (Uruguay), Benoa (Indonesia), Dalian (China), Suva (Fiji), Noumea (New Caledonia), Maputo, Beira, Nacala (Mozambique), Honiara (Solomon Islands), Pohnpei (Micronesia), Tarawa (Kiribati), Nuku-Hiva, Papeete (French Polynesia), Balboa (Panama), Callao (Peru)).	Designated ports include – Shimizu (Japan), Cape Town (South Africa), Port Louis (Mauritius) ¹³	N/A	None	2 designated ports - Cape Town (South Africa), Port Louis (Mauritius)

⁶ These figures are for vessels which were on the CCSBT authorised carrier vessel list during 2023

⁷ The figures presented are based on transshipment reports of SBT provided to the Secretariat. Note that where SBT is transhipped from the same fishing vessel at the same time (generally on the same date), but will be offloaded at more than destination, the Secretariat has counted this as a single transshipment event in this table.

⁸ The figure of 578 was derived from the CDS Catch Monitoring Forms that record transshipment activity, but to date Transshipment Declarations (TDs) have only been received for 35 transshipments that occurred during the 2023 calendar year (TDs were only received for some of those transshipments that occurred in Nov/Dec 2023).

⁹ Based on most recent information in National Reports.

¹⁰ These seven ports are designated for foreign fishing or carrier vessels carrying SBT, but Japan also notes that 10 domestic ports have been designated as ports where SBT products can be landed.

¹¹ These include Ulsan, Pohang, Donghae-Mukho, Masan, Yeosu, Gwangyang, Mokpo, Gunsan, Pyeongtaek Dangjin, Janghang, Daesan, Gyeongin, Incheon, Sokcho, Okgye, Samcheok, Hosan, Jinhae, Gohyeon, Okpo, Jangseungpo, Samcheonpo, Tongyeong, Hadong, Wando, Seogwipo, Jeju, Boryeong, Taean and Seoul.

¹² The Secretariat has not been advised of any formally designated foreign ports

¹³ Other ports may also be designated from time to time subject to prior request from vessel operators.

(C) Markets (2023 calendar year) - Quantities are net weights in tonnes ¹⁴**i) SBT Exported by Members on CMFs and the Corresponding Importers** (based on the export date being in 2023)

Mauritius	1.89
Philippines	16.66 ¹⁷
Switzerland	1.34
USA	389.30
Grand Total	10954.78 ¹⁸

v) COMTRADE Table of Exports of Fresh plus Frozen SBT (for 2023)

Note: Non-cooperating Non-Members are shaded

NYA: Means "Not Yet Available"

Exporter	Total Net Weight (tonnes)
	2023
Australia	8537.73
EU	0 (223.93) ¹⁹
Indonesia	605.04 (NYA) ¹⁹
Japan	65.60
Korea	NYA
New Zealand	860.77
South Africa	81.25
Taiwan	NYA
Brazil	7.66
USA	2.43
Grand Total	9779.37 ¹⁸

¹⁶ The bolded import figure is from the best available annual trade data summary provided by the EU and Indonesia from their own database as requested by CC16, whereas the figure in brackets is the trade figure recorded on COMTRADE for the EU and Indonesia. The EU reiterated that they do not advise the use of COMTRADE, noting that SBT trade figures are, in reality, trade of other species mislabelled as SBT. Past assessments of similar cases showed that BFT is frequently encoded as SBT but also species of tropical tunas. The EU is a customs union and as such formally speaking there are no exports and imports between EU Member States. Intra-EU trade figures are provided for statistical purposes on the basis of self-declarations by trade operators, who are not necessarily taxonomy experts. The EU reported total for SBT Imports for 2023 as 10kg.

¹⁷ No net weight figure was available in COMTRADE for the Philippines, so the figure shown is the reported gross weight figure.

¹⁸ The grand total is summed from COMTRADE figures only, *i.e.* the COMTRADE figures in brackets for the EU and Indonesia are included in the Grand Total rather than the bolded figures

¹⁹ The bolded export figure is from the best available annual trade data summary provided by the EU and Indonesia from their own database as requested by CC16, whereas the figure in brackets is the trade figure recorded on COMTRADE for the EU and Indonesia.

vi) Information from Tables iii) to v) above combined as well as Estimated Net Catch Weight from the CDS (for 2023 calendar year)

Note: Only those NCNMs recorded as intended export destinations on CMFs/REEFs or recorded with more than 2t of exports/imports in the COMTRADE database in 2023 are included here.

CDS data columns are shaded grey

NA: Means 'Not Applicable'

NYA: Means "Not Yet Available"

	Hong Kong	NA	NA		0.59	3.21	
	Maldives	NA	NA			10.93	

²⁰ Column A is estimated CDS wild catch (and farm harvest for Australia) per Member and includes any SBT recorded on CMFs where the domestic landing validation dates, or export certification and/or export validation dates of the CMF were in 2022. The figures in Column A are CDS estimated net weights not CDS estimated whole weights (like those provided in Attachment B). Catch/harvest net weights can then be compared to export/import net weights.

²¹ The figures in Column F are approximate. They represent the calculation Japan proposed for, "Estimated Domestic Distribution (Market Size)" in paper CCSBT-EC/2010/19. The value calculated in Column F does not take into account that exports/imports of SBT caught/harvested in 2023 may not all occur within 2023. Therefore, the calculated values in Column F may be an under- or over-estimate.

Taiwan	12.98%	17.61 %	17.55%	15.48 %
<i>Vessel Monitoring Systems (2023 fishing season)</i>				
Australia	VMS is mandatory for all SBT vessels – 87 of 87 vessels required to report to national VMS (in the 2022/23 fishing season) did report.			
EU	VMS requirements under CCSBT, CCAMLR, ICCAT, IOTC and WCPFC apply. All vessels are required to report to the Fisheries Monitoring Centre (FMC) of the Flag State.			
Indonesia	Based on Ministry Regulation No. 10/2019, Indonesian fishing vessels > 30GT are required to report to a National VMS System. 254 Indonesian fishing vessels > 30GT and 17 carrier vessels were required to report. 254 vessels reported to the national VMS during 2023.			
Japan	Mandatory for all far seas fishing vessels. 79 authorised fishing vessels and 4 authorised carrier vessels were required to, and did report to the national VMS in the 2023/24 fishing season.			
Korea	Mandatory for all SBT fishing vessels. 9 active fishing vessels were required to report to a national VMS in the 2023/24 fishing season all did report.			
New Zealand	New Zealand has implemented mandatory geospatial positional reporting (GPR) across 100 percent of the commercial fishing fleet. This system meets the specifications outlined in the VMS resolution. All NZ vessels catching SBT that were required to report to the GPR system during 2023 did report.			
South Africa	Mandatory for all vessels – South Africa has not yet reported how many authorised vessels were required to and did report to a national VMS during 2023.			
Taiwan	Mandatory for all SBT fishing vessels. 64 authorised fishing vessels and 8 authorised carrier vessels were required to, and did report to the national VMS during the 2023/24 fishing season.			

²² Based on Members' National Reports

²³ ETBF refers to the Eastern Tuna and Billfish Fishery and WTBF refers to the Western Tuna and Billfish Fishery. Both fisheries are part of the longline sector. Observer coverage has been grouped for 2023 to match the format that it is reported in the AU national report.

²⁴ Figures are for the 2021/22 and 2022/23 fishing seasons for the purse seine fleet

²⁵ The percentages represent the percentage of retained SBT that were observed when caught

²⁶ Pertains to hooks observed in the SBT area

²⁷ Japan advised that scientific observers could not be dispatched to Japanese vessels targeting SBT in the 2022/2023 season due to the impact of the COVID-19, which did not allow movements of observers from their homes to the ports to board fishing vessels.

²⁸ Figures are for the 2021/22 and 2022/23 fishing seasons. New Zealand stated that the deployment rates in the 2022/23 fishing season were primarily due to observer deployments not proceeding because of health and safety concerns relating to inadequate watchkeeping practices, but that New Zealand has now rolled out on-board cameras which has significantly improved monitoring of the surface longline fleet. New Zealand further stated that with the rollout of onboard cameras complete, observers will be placed onboard SLL vessels as an exception, for research or other specific purposes.

Table a: Data Submitted on the Number and Estimated Whole Weight of SBT Submitted by South Africa for the 2023 Fishing Season (as at 05/09/2024)

Type of data based on:	Number of SBT in Data Submitted to Secretariat	Comment	Estimated Whole Weight (t) based on Data Source
Catch by fleet data	1456		108.71
Monthly Catch Report	Not applicable		109.22
Carry-Forward Notification	Not applicable		109.1
National Report to CC			
CMF data	1,438		159.78 ¹
CTF data	1439		123.23 ²

Table b: Data Submitted on the Number and Estimated Whole Weight of SBT Submitted by South Africa for the 2022 Fishing Season (as at 18/09/2023)

Type of data based on:	Number of SBT in Data Submitted to Secretariat	Comment	Estimated Whole Weight (t) based on Data Source
Catch by fleet data	Not provided	The summary required for Data Exchange (including numbers of SBT) was not provided	Not provided
Monthly Catch Report	Not applicable		150.91
Carry-Forward Notification	Not submitted (no carry-forward)		NA
National Report to CC	Not provided		Not provided
CMF data	1,900	152 SBT <i>more</i> than recorded in the tagging data	216.8
CTF data	1,748	152 SBT <i>less</i> recorded on CMFs	151.6

Table c: Data Submitted on the Number and Estimated Whole Weight of SBT Submitted by South Africa for the 2021 Fishing Season

Type of data based on:	Number of SBT in Data Submitted to Secretariat	Comment	Estimated Whole Weight (t) based on Data Source
Catch by fleet data	Not provided	The summary required for Data Exchange (including numbers of SBT) was not provided; only catch weight per vessel for the season was provided	111.1
Monthly Catch Report	Not applicable		110.06
Carry-Forward Notification	Not applicable		110.1t commercial catch + 5t allowance for potential recreational catch

¹ This estimated whole weight applies the conversion factor of 1.8 for SBT processed to DRO, which was applies to more than 90% of SBT on CMFs submitted by South Africa. South Africa have indicated they believe this conversion factor is very high and that their preliminary analysis of the data they had collected put the conversion factor at around 1.27.

² Most SBT in tagging data submitted by South Africa is landed GGO, with only around 5% of SBT reported as landed DRO in tagging data.

National Report to CC	1,286		111.1
CMF data	1,407	121 SBT more than noted in the National Report; 145 SBT more than recorded in the tagging data	172.6
CTF data	1,262	24 SBT less than noted in the National Report; 145 SBT less than the CMF total	107.7

Table d: Data Submitted on the Number and Estimated Whole Weight of SBT Submitted by South Africa for the 2020 Fishing Season

Type of data based on:	Number of SBT in Data Submitted to Secretariat	Comment	Estimated Whole Weight (t) based on Data Source
Catch by fleet data	Not provided	The summary required for Data Exchange (including numbers of SBT) was not provided; only catch weight per vessel for the season was provided	118.5
Monthly Catch Report	Not applicable		117.61
Carry-Forward Notification	Not applicable		117.51
National Report to CC	1,382		118.4t commercial catch + 5t allowance for potential recreational catch
CMF data	1,378	4 SBT less than noted in the National Report; 67 SBT more than recorded in the tagging data	162.31
CTF data	1,311	71 SBT less than noted in the National Report; 67 SBT less than the CMF total	111.66

Table e: Data Submitted on the Number and Estimated Whole Weight of SBT Submitted by South Africa for the 2019 Fishing Season

Type of data based on:	Number of SBT in Data Submitted to Secretariat	Comment	Estimated Whole Weight (t) based on Data Source
Catch by fleet data	2,597		160.45
Monthly Catch Report	Not applicable		172.074
Carry-Forward Notification	Not applicable		172.073
National Report to CC	2,539		173.4t commercial catch + 5t unaccounted mortality (including potential recreational catch)
CMF data	2,568	This is 29 SBT less than noted in the catch by fleet total	220.3
CTF (tagging) data	2,539	This is 58 SBT less than noted in the catch by fleet total; 29 SBT less than the CMF total	174.2

Table f: Data Submitted on the Number and Estimated Whole Weight of SBT Submitted by South Africa for the 2018 Fishing Season

Type of data based on:	Number of SBT in Data Submitted to Secretariat	Comment	Estimated Whole Weight (t) based on Data Source
Catch by fleet data	2,958		235.4
Monthly Catch Report	Not applicable		235.3
Carry-Forward Notification	Not applicable		207.1
CMF data	2797	This is 161 SBT less than noted in the catch by fleet total	292.0
CTF (tagging) data	2294	This is 664 SBT less than noted in the catch by fleet total; 503 SBT less than the CMF total	182.3

Table g: Data Submitted on the Number and Estimated Whole Weight of SBT Submitted by South Africa for the 2017 Fishing Season

Type of data based on:	Number of SBT in Data Submitted to Secretariat	Comment Regarding Number of SBT	Estimated Whole Weight (t) based on Data Source
Catch by fleet data	1575		136.4
Monthly Catch Report	Not applicable		147.65
Carry-Forward Notification	Not applicable		147.65
CMF data	1187	388 SBT less than noted in the catch by fleet total	147.92
CTF (tagging) data	1207	368 SBT less than noted in the catch by fleet total; 20 SBT more than the CMF total	126.58
